

NAME

ProjectBuilder::Changelog, part of the project-builder.org – module dealing with changelog management

DESCRIPTION

This modules provides generic functions suitable for changelog management for project-builder.org

USAGE**pb_changelog**

Function that generates the changelog used in build files, or for announcements (web, mailing-list, ...)

It takes 3 parameters: The first parameter is the %pb hash containing package info The second parameter is the file descriptor on which to write the changelog content. The third parameter is a flag in the configuration file indicating whether we want changelog expansion or not.

WEB SITES

The main Web site of the project is available at <<http://www.project-builder.org/>>. Bug reports should be filled using the trac instance of the project at <<http://trac.project-builder.org/>>.
